COAST Introduces Innovative LK375 Light Knife

High Performance LED Light Combined with Extremely Versatile Knife

PORTLAND, OR, January 5, 2015 – We’ve all been in this situation: a sharp knife in one hand and a flashlight in the other, trying to make a decent cut, one-handed, in a dark environment. If you’re lucky, you make a cut that’s “good enough”. If you’re unlucky, a poor cut or even a dangerous situation can arise.

For safety, accuracy and peace-of-mind, COAST Products customers have asked for a stand-alone tool that combines both a high quality knife with a quality, high-output light. COAST has combined its 96 years of knife making with their industry leading flashlight technology to introduce the brand new **LK375 Light Knife**. For maximum versatility in one tool, this new knife is ideal for those who work, adventure, trek or engage in all-terrain or jobsite situations. See the LK375 for the first time at the Shooting, Hunting and Outdoor Trade ([SHOT](#)) Show, Booth 15120.

COAST's New LK375 Light Knife

Innovative Design, Engineering and Manufacturing Create One-of-a-Kind Light Knife

Providing effortless performance, day in and day out, COAST's new LK375 is the first knife that includes a real, usable LED flashlight rated by the ANSI FL1 standard to 110 lumens. Powered by a single AAA battery (not button cells), the LX375 is truly a two in one tool, a high quality flashlight with a top-notch optic, the COAST Universal Spot Beam, and a one handed opening, partially serrated knife. The light will project a beam for 53 meters and will run for one hour and 30 minutes on high and over four hours on low. The LK375 is also waterproof rated to IPX7.

–more–

The LK375's 110 lumen output provides exceptional light when working in a challenging, darkened area, while on night patrol or when hunting, trekking through base camp, or in any low light or dark conditions. The LK375's on and off button controls the on/off function and is easy and comfortable to reach with a thumb or one finger of the hand the knife is being held in. The switch function stays on momentarily and has low and high selection levels.

Exceptional Craftsmanship, Built to Last

The Light Knife features a heavy duty, drop point blade, an oval cut-out in the blade for fast, easy opening and a liner lock that automatically locks the blade in the open position. The blade has a partially serrated edge with glass bead finish that resists corrosion. It is 3.75 inches (9.5 cm) long, when closed, and 8.5 inches long (21.5 cm) when open, weighs 5.30 ounces and has a Polycarbonate handle housed in a stainless steel frame. The Light Knife has a pocket clip for convenient carry and the handle has thumb notching for added versatility and control. Resilient in all-environments and temperatures, the LK375 blade is made of high-quality 7Cr17stainless steel, making it the ideal knife for an indoor or outdoor jobsite.

Providing a consistent cut each time, along with an exceptional LED light, the LK375 also meets ANSI specifications. And, as with COAST's entire product line, the new Light Knife is backed by a lifetime warranty.

LK375 Knife Specifications

- 2.75 mm, drop point, flat grind 7Cr17 stainless steel blade
- Polycarbonate handle
- 4.75 inches (120 mm) closed
- 8.5 inches (216 mm) open

- Run Time: 1 hour 30 minutes (High), 4 hours (Low)
- Beam Distance: 174 feet (53 meters) on High, 88 feet (27 meters) on Low
- IPX7-Rated: Water Resistant
- Battery: 1 AAA

“Our customers want a professional, high-quality knife with exceptional lighting capability. Our new LK375 delivers on this goal and is backed by extensive in-field and lab testing,” remarked David Brands, President of COAST. “The new LK375 has superior cutting capability, yet it also provides a strong light on nearly any project, making it the perfect tool for any hunter or avid outdoors person – and for law enforcement officers, emergency responders or the military. This multi-function knife and light makes everyday work and leisure experiences easier, much safer and more expeditious. This new Light Knife meets the rigorous daily standards for adventure seekers, tactical units and do-it-yourselfers to complete their tasks or projects.”

The LK375 Light Knife will be available for shipment mid to late January. Follow COAST at one of the social media channels below for the latest information, or check the COAST website for the latest information.
