## Unique, Patented Double-Lock Pro Razor Knife Will Launch at AAPEX

**New Design from COAST Brings Significant Safety Advancement and  
Added Performance for Fundamental, Everyday Tool**

**PORLAND, OR, October 15, 2015** – Accidental punctures and lacerations are one of the three most frequent causes of lost-time accidents in the automotive aftermarket industry according to the Industrial Accident Prevention Association [OSHA Lost Time Injury Analysis, Dec. 2004]. Those stats could be lowered dramatically by using the new DX200 Pro Razor Knife from COAST.

The DX200 – with its ground-breaking, dual-locking capability – will be making its debut at the Automotive Aftermarket Products Expo ([AAPEX](#)) next month. Anyone who needs the best folding razor knife available, and wants the safest cutter ever made, will want to see this remarkable tool in person.

COAST will exhibit the DX200 along with a wide array of industry-leading knives, LED flashlights, headlamps, lanterns, and multi-tools during AAPEX at [Booth 1476](#). The show runs from Nov. 3-5, in Las Vegas at the Sands Expo.

COAST products offer advanced quality and innovation, the latest patented and proprietary features and technology, and are perfect for every professional or DIY mechanic, retailer or distributor in the automotive aftermarket channel.

-more-

The DX200 is designed to significantly increase safety, whatever punishment comes its way, in the repair shop or during any daily undertaking. With its double lock, comfortable grip, and innovative razor replacement chamber, the DX200 may well be the safest cutting tool on the market today.

### Twice as Safe with New Double Lock

COAST has created the all-new DX200 with user safety as the number one priority. It can be locked open with both the liner lock, which engages automatically when the blade is opened, and the proprietary, new double lock mechanism. After opening the knife, simply slide the locking apparatus forward to dramatically increase protection from the dangers other knives present. Slide the mechanism back to unlock.

But COAST didn't stop there when developing this indispensable new tool. Comfort and ease of use were considered essential, too. The lightweight nylon, fiberglass filled handle is textured to provide a sure grip; and it is contoured too, meaning added accuracy and less fatigue. The safety detent-action is adjustable to your desired tension with a screw on the side of the knife. The liner is full stainless steel for strength and resistance to corrosion. One handed, tactical style opening maximizes the knife's functionality in less than ideal conditions.

The interchangeable E-Z Replace razor blade holder makes the DX200 even more functional and unique, assuring that you have a new, sharp blade always available. Notably, changing blades in the holders is easily and quickly accomplished with the press of a button and the DX200 includes three extra blades in each package.

### COAST DX200 Specifications

- Liner-Lock with Double Lock
- Fiberglass Filled Nylon Handle
- Stainless Steel Liners
- Thumb Stud for Ambidextrous Opening
- Single Position Pocket Clip
- Standard Sized Double Ended Utility Blades

"Through partnership and consultation with aftermarket autoworkers, our new DX200 knife is engineered with top-notch safety in mind for the most demanding group of mechanics," remarked David Brands, President of COAST. "Our new razor knives have exclusive, patented Double Lock safety, superior quality and incomparable performance. Whether you are working on detailed repairs or installing upgrades, our new knives will impress and satisfy in the most arduous conditions – with knives our customers can count on totally, day in and day out."

The DX200 is for any repair that requires a top-quality tool. The DX200 knife, as with COAST's entire product line, is backed by a lifetime guarantee against defects in materials and workmanship. COAST's near-100-years of knife production and construction experience make its line of tools highly desirable to the service facilities that offer repairs on passenger cars and light trucks, as well as to any professional or weekend mechanic who wants the very best, and safest utility knife available.
